ICERAM[®]

TOTAL GLASS

Self-Ligating Ceramic Bracket

ORTHOMETRIC SELF-LIGATING BRACKET WITH THE BEST AESTHETICS

The Iceram Total Glass, Orthometric Passive Self-ligating Bracket is **100% aesthetic**, made of the purest polycrystalline aluminum oxide at a concentration of more than 99%, the result of the highest sintering technology, which allows for much more precise and comfortable shapes.

DIFFERENTIALS:

One of the great differentials of this bracket is on its door, made of polycrystalline ceramic, offering a **100% aesthetic treatment for the patient**.

It has a **passive closing mechanism**, which reduces friction and is excellent for the sliding mechanics. In addition, its door is easy to open using only an exploratory probe.

4 Anatomical base providing better fitting and retention

Easy opening using only an explorer probe

5

The brackets provide a more precise fit of the wires inside the channel, making it possible to increase the interval between appointments and make the alignment and leveling phases more efficient, especially when used with thermo-activated wires.

It has a design that allows using ligatures, enabling precise adjustments, especially in the final phase of the orthodontic treatment.

IMPORTANT:

The parts for lower premolars are metal brackets for better resistance to masticatory forces, which are greater in these positions.
